Practice: ecological evidence

Teacher / technician

YEAR 11 / LESSON 114 / BIOLOGY + SCIENCE (DOUBLE AWARD)

Staff preparation and answer guidance. Keep separate from student sheets. Original learning tasks; no supplied numerical example represents class measurements.

Coverage and delivery

Shared ecology and human impacts; Biology-only biodiversity extension marked.

Allow about 60 minutes. Follow the student sequence and use the answers to check reasoning.

Requisition • class of 30, working in 15 pairs

Item	Per pair / setup	Class total
Student booklets	1 per learner	30
Printed practice dataset and calculation paper	1 set per pair	15 sets
Rulers	1 per pair	15

Immediate safety

Paper, modelling and written reasoning only. No chemicals or biological samples are handled.

Preparation and delivery

Read alongside the student method

YEAR 11 / LESSON 114 / BIOLOGY + SCIENCE (DOUBLE AWARD)

1. Provide 30 booklets, 15 rulers and 15 sets of printed practice dataset and calculation paper.

2. Keep answers separate until learners have attempted the tasks; discuss the reasons for corrections.

3. Print the five stated quadrat counts, the 500/45 kJ efficiency example and both four-species count sets. Label every set as invented practice data; pupils show working before using the answer guide.

Close of lesson

• Return models and keep the corrected work.

Check before teaching

Check the cards, reference data and quantities against this requisition. Keep the staff answer guide separate until the checking stage. Supplied numerical practice datasets are labelled examples; they are not class measurements.

Answers and teaching notes

Expected explanations • do not give as experimental observations

YEAR 11 / LESSON 114 / BIOLOGY + SCIENCE (DOUBLE AWARD)

- 3.
- 12 individuals m^{-2}.
- 720 individuals.
- 9%.
- Only a sample was counted and placement/identification uncertainty remains.
- No.
