Biology extension review: mechanisms

Teacher / technician

YEAR 11 / LESSON 115 / BIOLOGY ONLY

Staff preparation and answer guidance. Keep separate from student sheets. Original learning tasks; no supplied numerical example represents class measurements.

Coverage and delivery

Biology-only consolidation of extension content.

Allow about 60 minutes. Follow the student sequence and use the answers to check reasoning.

Requisition • class of 30, working in 15 pairs

Item	Per pair / setup	Class total
Student booklets	1 per learner	30
Previous extension worksheets and mechanism diagrams	1 set per pair	15 sets
Rulers	1 per pair	15

Immediate safety

Paper, modelling and written reasoning only. No chemicals or biological samples are handled.

Preparation and delivery

Read alongside the student method

YEAR 11 / LESSON 115 / BIOLOGY ONLY

1. Provide 30 booklets, 15 rulers and 15 sets of previous extension worksheets and mechanism diagrams.

2. Keep answers separate until learners have attempted the tasks; discuss the reasons for corrections.

3. Select previously completed enzyme-pH, potometer, kidney, immunity and protein-synthesis worksheets, with anonymised spares where needed. Choose three topics to revisit. This is a desk review with no repeat practical, specimen handling or personal medical interpretation.

Close of lesson

• Return models and keep the corrected work.

Check before teaching

Check the cards, reference data and quantities against this requisition. Keep the staff answer guide separate until the checking stage. Supplied numerical practice datasets are labelled examples; they are not class measurements.

Answers and teaching notes

Expected explanations • do not give as experimental observations

YEAR 11 / LESSON 115 / BIOLOGY ONLY

- No; it changes water permeability.
- No; a bubble potometer measures uptake.
- Neurotransmitter molecules.
- It specifies an amino acid or translation signal in the genetic code.
- Memory-cell responses support faster antibody production.
- Two factors differ, weakening attribution to pH.
