Mutation and variation

Teacher / technician

YEAR 11 / LESSON 97 / BIOLOGY + SCIENCE (DOUBLE AWARD)

Staff preparation and answer guidance. Keep separate from student sheets. Original learning tasks; no supplied numerical example represents class measurements.

Coverage and delivery

Shared Biology / Double Award: 3.33–3.34. Biology-only extension: 3.35B–3.36B DNA changes and phenotype.

Allow about 60 minutes. Follow the student sequence and use the answers to check reasoning.

Requisition • class of 30, working in 15 pairs

Item	Per pair / setup	Class total
Student booklets	1 per learner	30
Fictional variation and labelled sequence-model cards	1 set per pair	15 sets
Rulers	1 per pair	15

Immediate safety

Paper, modelling and written reasoning only. No chemicals or biological samples are handled.

Preparation and delivery

Read alongside the student method

YEAR 11 / LESSON 97 / BIOLOGY + SCIENCE (DOUBLE AWARD)

1. Provide 30 booklets, 15 rulers and 15 sets of fictional variation and labelled sequence-model cards.

2. Keep answers separate until learners have attempted the tasks; discuss the reasons for corrections.

3. Copy the three fictional variation examples and labelled coding-DNA sequences from the student reference onto cards; retain the distinction between coding and template strands.

Close of lesson

• Return models and keep the corrected work.

Check before teaching

Check the cards, reference data and quantities against this requisition. Keep the staff answer guide separate until the checking stage. Supplied numerical practice datasets are labelled examples; they are not class measurements.

Answers and teaching notes

Expected explanations • do not give as experimental observations

YEAR 11 / LESSON 97 / BIOLOGY + SCIENCE (DOUBLE AWARD)

- Yes.
- No.
- No.
- No; the genetic code and sequence context matter.
- No.
- Yes.
